

Detailed Instructions on Configuring Vision Z-Wave Keyfob in VeraEdge UI7

Please ensure that you are opening this guide on either a Laptop or PC

1. Load up your Vera Interface and select Devices.
2. Navigate to your Z-Wave Keyfob that should be under the room that you assigned it to and press the arrow on the right hand side to enter its options.

3. Scroll down to Advanced and select it, then select New service.

- Copy the following text into their corresponding areas

New Service: urn:micasaverde-com:serviceId:SceneController1

New Variable: NumButtons

New Value: 8,1-1-1=ui7_lang_tap_button 1,2-1-2=ui7_lang_hold_button 1,3-1-3=ui7_lang_tap_button 2,4-1-4=ui7_lang_hold_button 2,5-1-5=ui7_lang_tap_button 3,6-1-6=ui7_lang_hold_button 3,7-1-7=ui7_lang_tap_button 4,8-1-8=ui7_lang_hold_button 4

- After copying the text, press Add, and wait for the text next to the Add button to disappear. After which press Reload Engine then force reset your browser (Ctrl+F5)
- After your browser has refreshed follow steps 1-3 again however instead of entering the text in step 4 you will need to enter the following text, and repeat step 5 afterwards

New Service: urn:micasaverde-com:serviceId:SceneController1

New Variable: ButtonMapping

New Value: 1-0-1,1-3-2,2-0-3,2-3-4,3-0-5,3-3-6,4-0-7,4-3-8

- After finishing all the previous steps, to ensure the set-up was correct go back into the device but instead of advanced go to Select scenes for device buttons it should look like the following.

Activate the following scenes and set the house mode when the buttons are turned on:

Tap button 1	Please choose house mode, scene or No Change ▼
Hold button 1	Please choose house mode, scene or No Change ▼
Tap button 2	Please choose house mode, scene or No Change ▼
Hold button 2	Please choose house mode, scene or No Change ▼
Tap button 3	Please choose house mode, scene or No Change ▼
Hold button 3	Please choose house mode, scene or No Change ▼
Tap button 4	Please choose house mode, scene or No Change ▼
Hold button 4	Please choose house mode, scene or No Change ▼

Assign scenes to buttons

- When creating scenes set the trigger to manual not the Keyfob and manually assign each scene to the button you wish to use for the scene.
